

QPA BARRIERWEAR®

Breathable | Dry Particulate | Liquid Spray & Splash

Clean Manufactured • Low Linting • ASTM F1670 Blood Borne Pathogen • Serged Seams

QPA Barrierwear® protective apparel is designed to be used in dry and wet environments where the main goal is stay clean, comfortable, and protect critical products. The unique physical properties offers a very breathable material without compromising filtration efficiency and protection. Low particle count of the material and clean manufacturing processes provide superior protection for your processes. The real world design puts more material in high stress areas such as the shoulders, crotch, and seat, reducing blowout.
